***PLEASE MAKE SURE TO KEEP AN EYE
OUT FOR DEER CROSSING!!***

- Be attentive in the early morning and evening hours; this is the most active time for deer.
- Pay close attention to deer crossing signs; they are installed in places where there are typically more deer.
- Wear your seat belt, keep your headlights correctly adjusted and use your high beams where possible.
- If you see a deer near the side of the road, slow down and blow your horn; some suggest also flashing your headlights to scare the deer away.
- If you see a deer in front of you, brake firmly, don't swerve, stay in your lane and bring your vehicle to a controlled stop. It is better to hit the deer than to swerve and lose control of your vehicle and risk rolling over or hitting a tree or oncoming traffic.
- If you hit a deer, do not leave your vehicle. The injured deer could hurt you. Try to get your vehicle off the road or as far as safely possible to the side and call the police.
