May is Motorcycle Safety Awareness Month

“Look Twice—Save a Life”

- 200 million motorcycles are on the road world-wide.
- 57% of all motorcycle accidents happen at or near intersections.
- 63% of motorcycle accidents are not the fault of the motorcyclist.

Keys to preventing accidents with motorcycles:

1. Look “twice” - take a second look especially when making left turns.
2. Check your blind-spots and mirrors and always signal your intentions.
3. Avoid Distractions.
